26305 Owens Lane, Freeman, MO 64746

## **PRICING FOR ATTIC FAN INSTALLATIONS**

**Kansas City Attic Fans services both home builders and home owners. If you are a home builder and need pricing please give us a call for contractor pricing. An attic fan installation is much simpler when part of the original new construction plan since the attic fan box and wiring is already prepared. Retro installations of an attic fan where the house had no pre-planning does require extra time & materials. An attic fan box has to be built, AC power has to be brought to the fan, sheet rock has to be cut and sometimes obstacles need to be moved. A rough estimate for most retro installations is: \$800-\$900. Please remember you are getting a high quality fan, not the cheapest attic fan available. These fans are built to last and will provide many years of use. Give us a call today for a more accurate attic fan installation estimate.**
